

To the FCC,
Please don't let the NAB prevent XM listeners from receiving local travel and weather reports. The NAB is just protecting the "local" interests because they are afraid to compete with XM Radio because XM radio offers a much better product (variety and service). They are using the local issue to try and stop XM from taking a foothold with the listening public. I have been an XM listener for over a year, I pay for this service, and I am very happy with it. Please take my comments under consideration.

Thank you.

Michael Ciavarella
